(54) HEALTHY BEVERAGE AND ITS PRODUCTION

(57) Abstract:

PURPOSE: To obtain a healthy beverage having an active oxygen-removing effect and useful for allergosis improvement, health promotion, beauty, etc., by mixing Aspalathus linearis tea with a dextrin aqueous solution, extracting the mixture with hot water, concentrating the extract with a membrane, and subsequently spray-drying the concentrated extract into powder.

CONSTITUTION: The needle tea of Aspalathus linearis is dried in the sun or in the shade, finely cut,

mixed with a dextrin aqueous solution, and subsequently extracted with hot water. The mixture is filtered, concentrated with a membrane, and then separated by reverse osmosis membrane, thermally sterilized for 15min, and subsequently cooled. The mixture is spray-dried, and the 40 mesh-pas of the dried product is collected to provide powder for the objective beverage, which contains a strong active oxygen-removing enzyme. The powder has a large active oxygen-removing effect, contributes to the improvement of allergosis and promotion of health, is effective also for beauty, and can be utilized also for cosmetics, bath agents,
